

The Office of Health Equity: An FSSA Commitment to Hoosier Health Outcomes

Healthy Opportunities:
Because good health begins
where we live, learn, work
and play.

Goals:

- 1) Increase clinical and public health expertise in policy and programming
- 2) Improve health equity

What is it?

- Social Determinants of Health
 - Conditions in which people are born, grow, live, work and age.
 - Circumstances shaped by distribution of money, power and resources at global, national and local levels.
 - Responsible for health inequities, which are avoidable differences in health status seen within and between groups.

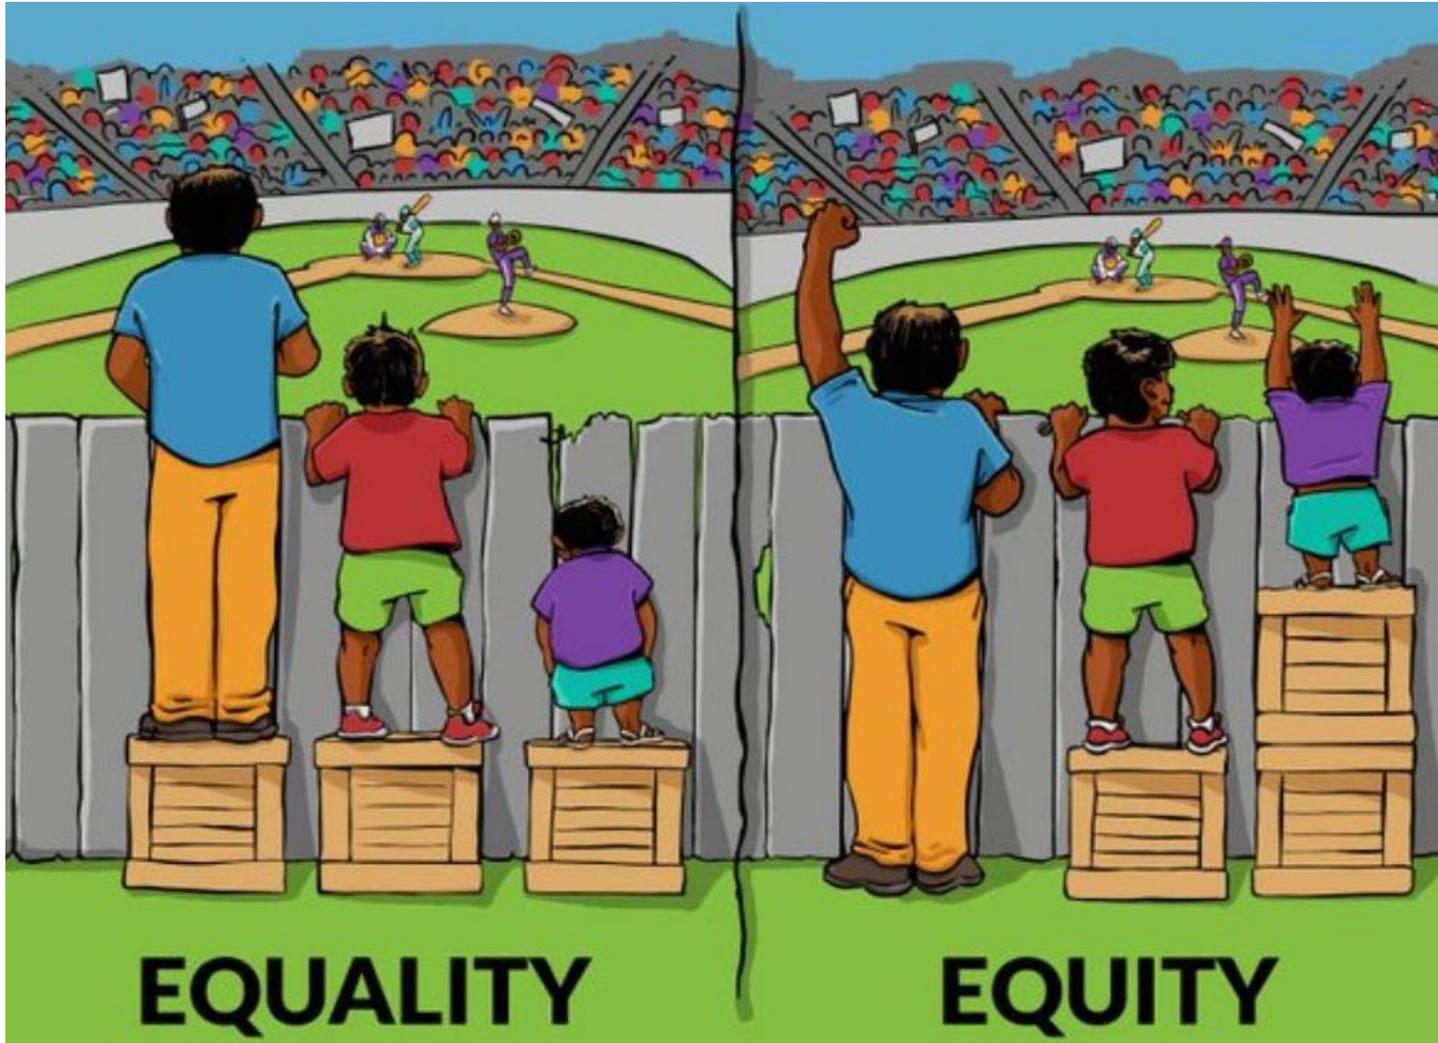

Ways to discuss Social Determinants of Health

1. Health starts long before illness, in our homes, schools and jobs.
2. All Americans should have opportunities to make choices that allow them to live a long, health life—regardless of their income, education or ethnic background.
3. Your neighborhood or job shouldn't be hazardous to your health.
4. Your opportunity for health starts long before you need medical care.
5. Health begins where we live, learn, work and play.
6. The opportunity for health begins in our families, neighborhoods, schools and jobs.²

Health Equity vs. Equality

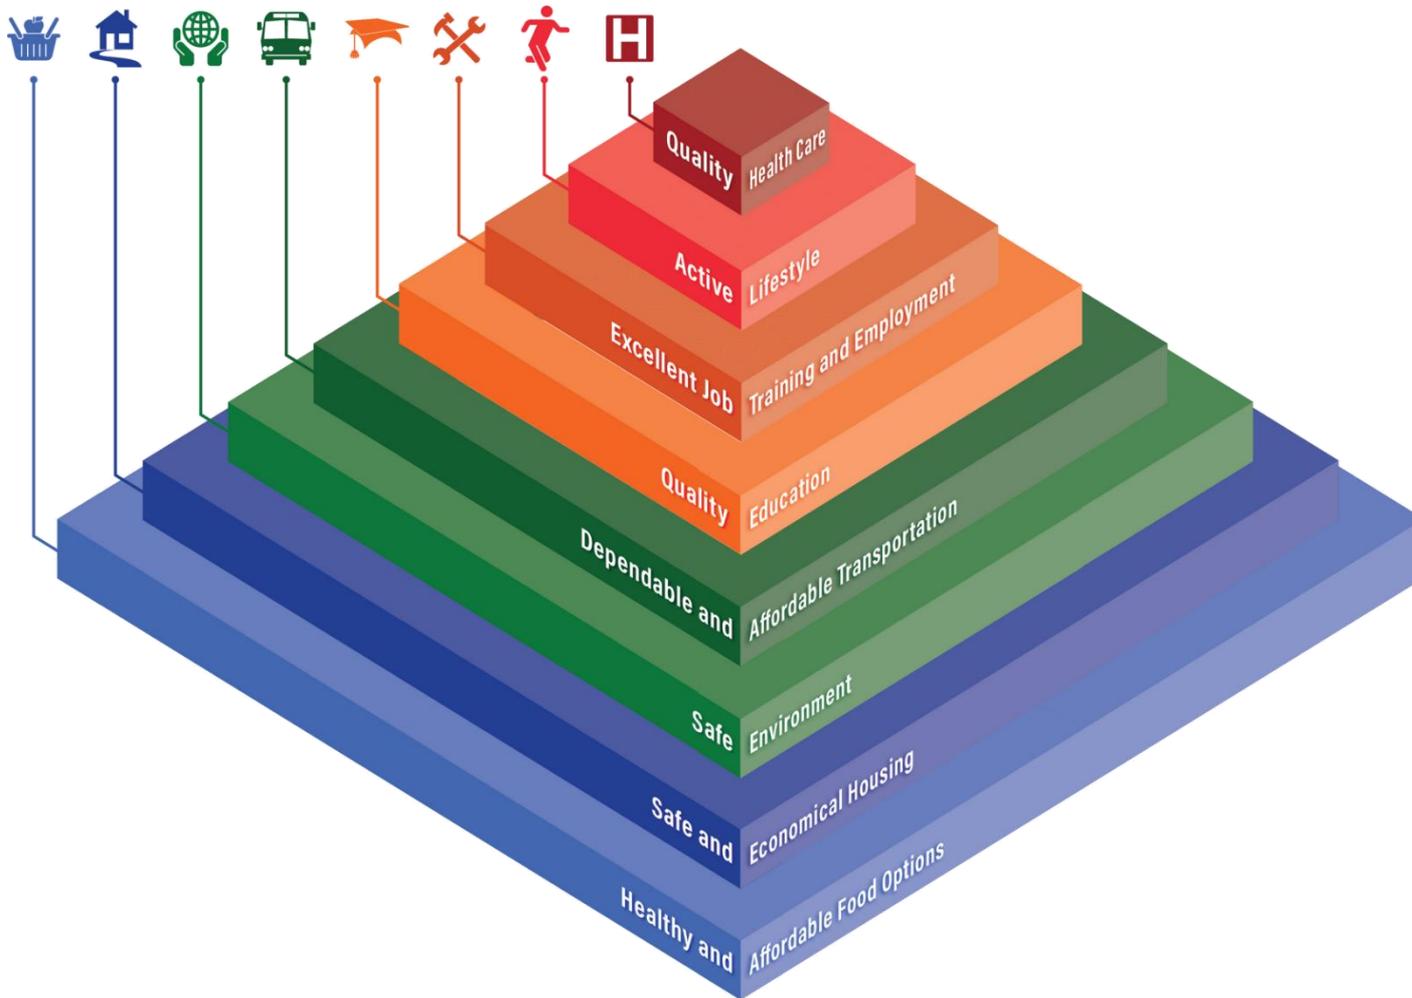

Health Equity & Disparities

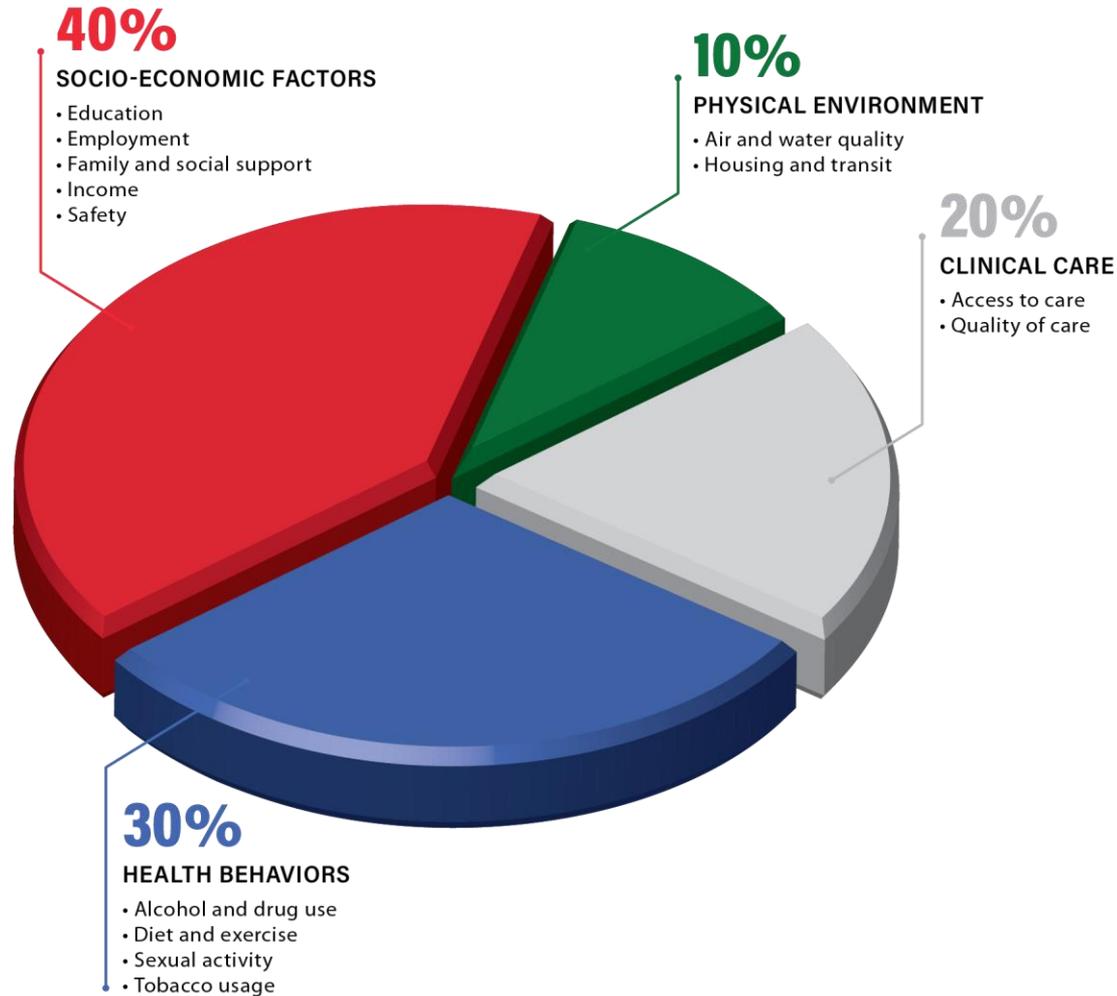

- Health Equity
 - Attainment of the highest level of health for all people and includes any efforts to ensure people have full and equal access to opportunities that enable them to lead healthy lives.
- Health Inequities
 - Differences in health that are avoidable, unfair, and unjust. Health inequities are affected by social, economic, and environmental conditions.
- Health Disparities
 - Differences in health outcomes among various groups of people.⁴

⁴ Healthy People 2020

Requires Access to Social & Physical elements

Three factors account for 80% of health outcomes

Social Determinants of Health

- Vision
 - All Hoosiers have equitable access to social and physical supports needed to promote health from birth through end-of-life.
- Mission
 - To reduce barriers that impede Hoosiers from achieving optimal individual health outcomes.

Social Determinants of Health Approach

SPONSOR AND CHANGE

Identifies sponsors, participants and how we manage change.

UNDERSTAND AND EVALUATE

Obtains and analyzes data from resources to identify and prioritize work.

IDENTIFY AND CONNECT

Utilizes information to identify the most critical needs and defines potential solutions to address needs.

ASSESS AND DEVELOP

Assesses current resources and workflows to determine where and how screening, referral and navigation can likely be integrated.

PARTNER AND COLLABORATE

Identifies potential community-based resources to help meet needs.

MEASURE AND IMPROVE

Develops success metrics, owners and a continuous improvement process for the program.

How to get there: Data

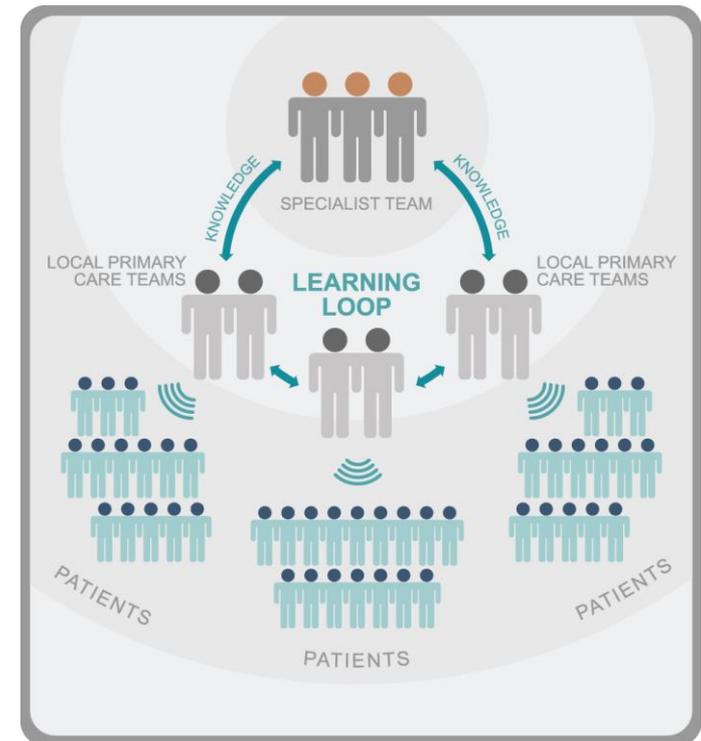

- INDVRS
- MPH
- Open Source Medicaid
- Registries - Trauma, EMS

Real time local data becomes predictive analytics

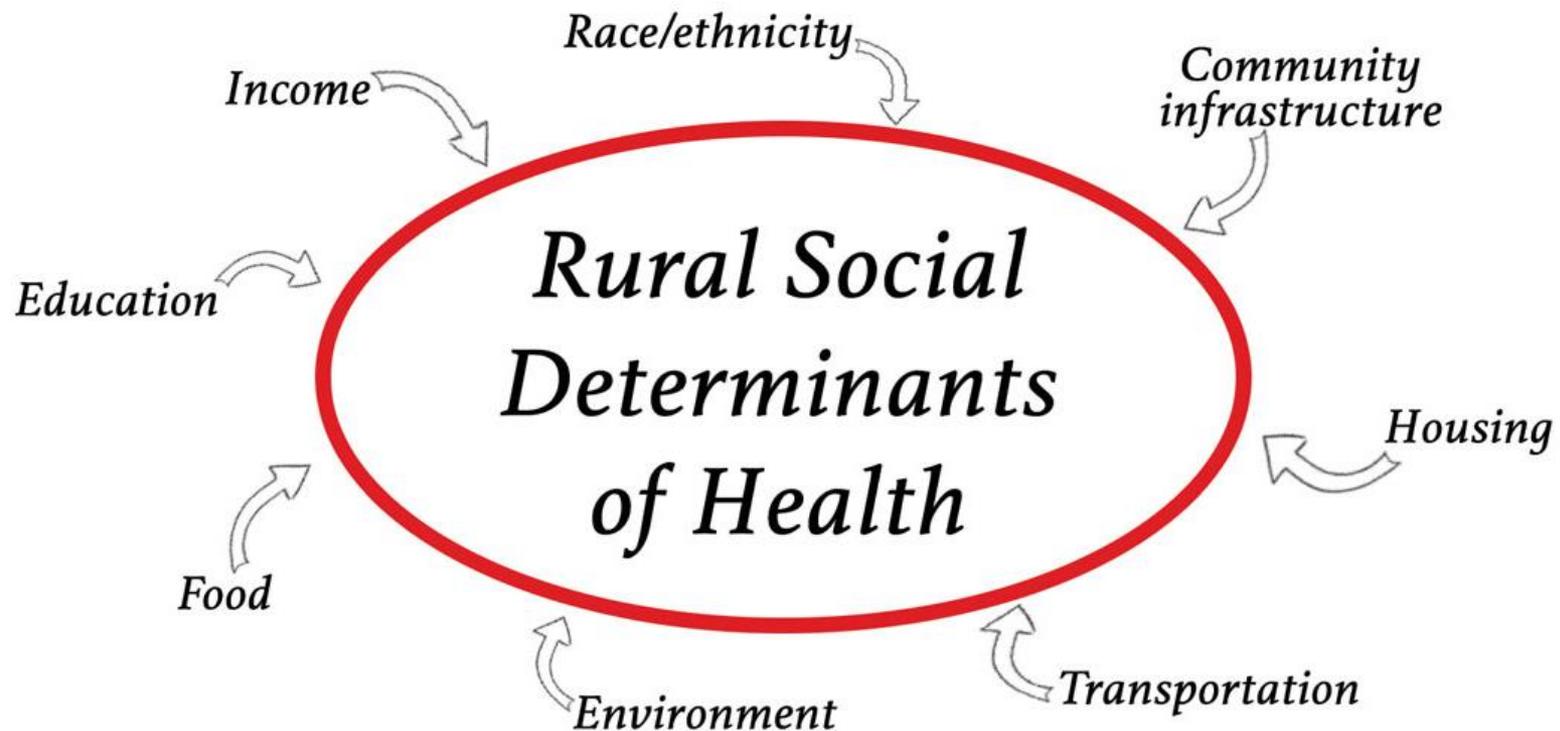

How to get there: Infrastructure

- Tele-health
- Service Co-location
- Community Health Workers
- Screening
- ECHO
- Stakeholder engagement

How to get there: Targeted Social Determinants

How to get there: Love
